Denbies' Gardens
Dorking

March 27. 1917.

Dear Sir

The amount of rainfall on February 28. 1916. $\overset{\text{ins}}{(2.66)}$ is quite correct, there was a lot of snow at the time but it finished up with a deluge of rain.

Yours truly
John Ansell.

Form A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1920.

Kept at Dorking, Denbies
in the County of
by per Bayard J. Ansell

Lat. Long.
Time of Observation
Nearest Railway Station
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground ft. 6 in.
" " " " Sea Level 610 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to The Superintendent, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

REGISTER OF RAINFALL IN 1913

FORM A. BRITISH RAINFALL.

2 JAN 1914

Kept at Pixham Firs, Dorking

in the County of Surrey

by J. C. Deverell Esq.

5

Lat. Long.

Time of Observation 9-a-m

Nearest Railway Station Dorking L.B.&S.C.R.

Diameter of Rain Gauge 8 in.

Height of top of Gauge above Ground ft. 6 in.

" " " " Sea Level 150? ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

TOTAL		No. of Days with Rain	

These figures are sent for comparison. See 26th.

Are not the daily figures one day late?

NOTE.—Observations returned on this form should be made at [illegible] a.m. daily, and entered *to the day preceding* that on which the amount is measured. If this is not done the reading on 1st of following month should be entered in the triangular space below.

1st of following month.

Dr. H. R. MILL,

British Rainfall Organization,

62, Camden Square,

LONDON, N.W.1.

Telephone No. 106 Regent.

22, Carlton House Terrace.
S.W.

30 April 1919

Dear Sir.

I very much regret the delay in replying to your letter of the 16th. in regard to the readings of the rain gauge at Ember House East Molesey in July 1918. I was away when our letter reached me and I was only yesterday able to see the original notes of the reading.

There is no doubt but that the reading of the 26th of 2.04 should be omitted altogether and that the .57, .12, .18 should be entered for the 26th, 27th & 28th.

I much regret the error & for the trouble it has given you about it. I cannot understand how the 2.04 reading can have been interpolated.

Yours faithfully

Wilfrid Taylor.

Carle Salter Esq
62 Camden Square N.W.1.

FORM A. 1. **METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.**

G+BR

REGISTER OF RAINFALL IN 1919.

17 MAR 20

Kept at East Molesey, Ember House
in the County of Surrey
by W. Taylor, per T. Bayard

Lat. .... Long. ....
Time of Observation ....
Nearest Railway Station ....
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. — in.
" " " " Sea Level 30 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

FORM A.
BRITISH RAINFALL
5. JAN 1918

REGISTER OF RAINFALL IN 1917

Kept at Lyden Croft
in the County of Surrey — very border of Kent
by C. Planck

Lat. Long.
Time of Observation 9 A.M. recorded to previous day
Nearest Railway Station Edenbridge Town Station
Diameter of Funnel of Rain Gauge 5 inches in.
Height of top of Gauge above Ground 1 ft. in.
" " " " Sea Level 212 feet ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1920.

8 JAN 1921

Kept at Queenwood Englefield Green
in the County of Surrey
by S. F. Rigden

Lat. .... Long. ....
Time of Observation ....
Nearest Railway Station ....
Diameter of Funnel of Rain Gauge ....in.
Height of top of Gauge above Ground ....ft. ....in.
" " " " Sea Level ....ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

REGISTER OF RAINFALL IN 1913

FORM A.
BRITISH RAINFALL.

2 MAR 1914

Kept at Esher Sewage Works Ex RR

in the County of Surrey 5

by F C Bayard H. C. Read

Lat. .... Long. ....

Time of Observation ....

Nearest Railway Station ....

Diameter of Rain Gauge .... in.

Height of top of Gauge above Ground .... ft. .... in.

" " " " Sea Level .... ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Sir/ I am sending the second copy of Rainfall for 1914, it is as correct as I can get it, as I have all ready sent one before about 3 weeks before, & it as put me to great inconvenience

With Dr. H. R. Mill's compliments.

Dr. Mill would be glad of a copy of rainfall record refered to on Mr. Bradfield's return for last year.

Mr. W. Bradfield.

FORM A.
BRITISH RAINFALL.

-4 FEB 1915

REGISTER OF RAINFALL IN 1914

Kept at Downhurst Lodge.
in the County of Ewhurst Surrey
by William Bradfield

Lat. Long.
Time of Observation 7 OC
Nearest Railway Station Cranleigh
Diameter of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. in.
" " " " Sea Level 350 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A.
BRITISH RAINFALL.
1° 19

REGISTER OF RAINFALL IN 1918

Kept at Pinecroft, Crooksbury Ridges, Farnham

in the County of Surrey

by Dr F. R. Walters

Lat. Long.

Time of Observation 9 am. (8.10 am "Summer Time")

Nearest Railway Station Tongham

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE DIRECTOR, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Pinecroft, Farnham Surrey
3 Mar 1919

I fear there was an error in my return of R.F. for June 1918, and in total for year.

The correct figures are as under:

June 1	—	11	—	21	.0.01
2	—	12	—	22	—
3	—	13	—	23	0.01
4	—	14	.0.24	24	0.03
5	—	15	0.06	25	—
6	—	16	0.15	26	—
7	0.01	17	—	27	—
8	—	18	0.19	28	—
9	0.11	19	0.08	29	—
10	0.08	20	0.04	30	—

Total for June 1.01
" 1918 31.21

FORM A. BRITISH RAINFALL. 4 JAN 1916

REGISTER OF RAINFALL IN 1915.

FARNHAM

Kept at Shortheath

in the County of Surrey 6

by Morris Birkbeck

Lat. 51° 11' 50" Long. 0° 48' 20" W

Time of Observation 9 AM.

Nearest Railway Station Farnham

Diameter of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 0 in.

" " " " Sea Level 352 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Dear Sir

I send my Register of Rainfall in 1916, but it has been so imperfectly kept, especially in June & Dec, as you will see, that I think it had better not be entered.

Yrs faithfully
I M Deedes

Wait A

Dr Mill

Dear Sir.

I am sending our Rainfall Records for last year. I wish to point out that we adopted the apparently universal rule of entering to the previous day, i.e Jan. 2nd, noted to Jan. 1st. & so on.

another explanation — you will notice — at Frensham Old Hall (or Farm where I reside) is the gauge we take — Sunday & Saturday — — —

at Frensham Hall, on the top of the hill. (some few 100 yards off) you will notice a considerably larger precipitation

Very truly yours

Saml. Kevan

Dr Mill

Dear Sir

I have made up, & send you our register from our two Rain gauges for 1915, I need not offer any Comments. as the figures speak for themselves, (but may remark 1915 was a bad year for Crops. see July precipitation. when Hay was "on", Later in the year.. fungoid disease nearly annihilated mistake in the taking of, or the reading of the measurements

Very truly yours

Saml. Kevan

I should be obliged for one or two forms. both A + B. in case of need

REGISTER OF RAINFALL IN 1918

FORM A. BRITISH RAINFALL

15.1.19

Kept at Waterworks, Frimley Green

in the County of Surrey.

by FRIMLEY & FARNBOROUGH DISTRICT WATER COMPANY.

Lat. ...... Long. ......

Time of Observation ......

Nearest Railway Station ......

Diameter of Funnel of Rain Gauge ...... in.

Height of top of Gauge above Ground ...... ft. ...... in.

" " " " Sea Level ...... ft.

As before

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE DIRECTOR, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1919.

Kept at Tomlinscote Frimley

in the County of Surrey

by J. Dawson

Lat. 51½° N Long. 0¾° W

Time of Observation 8. a.m.

Nearest Railway Station Frimley

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 10 in.

" " " " Sea Level 200 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following. 0·09

Records taken in Millimetres should not be entered on this form.

FORM A.
BRITISH RAINFALL.
4- JAN 19

REGISTER OF RAINFALL IN 1912 m s

Kept at Tilthams, Godalming
in the County of Surrey 6
by Colonel A. C. Bigg-Wither

Lat. 51° 12 N Long. 2-0 W
Time of Observation Between 8 & 9 AM
Nearest Railway Station Farncombe L.&S.W.R.
Diameter of Rain Gauge five in.
Height of top of Gauge above Ground 1 ft. 0 in.
" " " " Sea Level 130 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1916

FORM A.
BRITISH RAINFALL.

2 JAN 1917

Kept at Hascombe Place

in the County of Surrey

by Charles T. Musgrave

Lat. Long.

Time of Observation 9 a.m

Nearest Railway Station Godalming

Diameter of Funnel of Rain Gauge 6 in.

Height of top of Gauge above Ground 1 ft. 0 in.

" " " " Sea Level 390 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

25 FEB 1913

REGISTER OF RAINFALL IN 1912

Kept at Burrows Lea, Gomshall SHERE

in the County of Surrey 6

by M. E. Barnard

Rain Gauge: Pattern .... Diameter of top .... in. Height of top above Ground .... ft. .... in. „ „ „ Sea Level .... ft.

Time of Observation ....

Nearest Railway Station: Name .... Distance .... Direction ....

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A.
BRITISH RAINFALL.

9 JAN 19

H D

REGISTER OF RAINFALL IN 1916

Kept at Burrows Lea : Gomshall

in the County of Surrey

by Maud E. W. Barnard

Lat. Long.
Time of Observation 9 a.m.
Nearest Railway Station Gomshall 1 1/2 miles
Diameter of Rain Gauge 8 in.
Height of top of Gauge above Ground 1 ft. — in.
" " " " Sea Level 400 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1912

FORM A2.
BRITISH RAINFALL.
4 - JAN 1913

Kept at Cross Lanes, Guildford

in the County of Surrey 6

by W. F. Binfield Gardener to F. F. Smallpeice Esq.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 8 in.
" " " Sea Level 200 ft.

Time of Observation

Nearest Railway Station
Name London Road L.W.R.
Distance 100 yds Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1916

FORM A. BRITISH RAINFALL.

21. JAN.

Kept at Hazelhurst

in the County of Surrey

by H. Ives, Gardener to Mrs. Newman

Lat. Long.

Time of Observation 9 a.m.

Nearest Railway Station Haslemere, S.W.R.

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1920.

Kept at Haslemere, Hangerfield
in the County of Surrey
by J. P. Drew

Lat. .... Long. ....
Time of Observation ....
Nearest Railway Station ....
Diameter of Funnel of Rain Gauge .... in.
Height of top of Gauge above Ground .... ft. .... in.
" " " " Sea Level .... ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in *"Rules for Rainfall Observers,"* sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

REGISTER OF RAINFALL IN 1913

FORM A.
BRITISH RAINFALL
2- JAN 1914

Kept at Haslemere BEECH ROAD 6

in the County of Surrey

by Nelson K. Cherrill

Lat. .... Long. ....

Time of Observation 9. a.m.

Nearest Railway Station Haslemere

Diameter of Rain Gauge 5 in.

Height of top of Gauge above Ground – ft. 9 in.

" " " " Sea Level 540 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A.
BRITISH RAINFALL.

5 JAN 1916

REGISTER OF RAINFALL IN 1915

Kept at Miss Penfold's Courts Hill Haslemere

in the County of Surrey 6

by E. Miles Gardener

Lat. Long.

Time of Observation 9 a m

Nearest Railway Station Haslemere

Diameter of Rain Gauge 8 in.

Height of top of Gauge above Ground 4 ft. 6 in.

" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1918

FORM A.
BRITISH RAINFALL.
10 4 19

Kept at Hedley, The Hurst

in the County of Surrey

by Mrs Lyall per F. C. Bayard

Lat.
Long.
Time of Observation
Nearest Railway Station
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 3 in.
" " " " Sea Level 450 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE DIRECTOR, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

FORM A2.
BRITISH RAINFALL.
18 JAN 1912

nown

Kept at High Ashurst Dorking

in the County of Surrey 5

by The Dowager Countess of Harrowby

Rain Gauge: Diameter of top 5 in.
Height of top above Ground 3 ft.
" " " Sea Level 550 ft.
Time of Observation 9 am
Nearest Railway Station: Name Betchworth
Distance 2 mls Direction South

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1916

FORM A.
BRITISH RAINFALL.

11 JAN 1917

Kept at Stoatley Hall Haslemere
in the County of Surrey
by Henry Simmons

Lat. Long.
Time of Observation 9 A.M.
Nearest Railway Station Haslemere
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground ft. 15 in.
" " " " Sea Level 800 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1916

FORM A.
BRITISH RAINFALL.
29. MAR 1917

Kept at HOW GREEN RESERVOIR

in the County of SURREY

by

Lat. Long.

Time of Observation 9 a.m.

Nearest Railway Station Chipstead S.E.Ry

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 0 in.

" " " " Sea Level 528 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1915

FORM A.
BRITISH RAINFALL.

Kept at Goldwynds, Holmbury St Mary
in the County of Surrey
by Fredrick Cornish

Lat. Long.
Time of Observation 9 Am
Nearest Railway Station Gomshall
Diameter of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. in.
" " " " Sea Level 550 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
16 JAN 1912

REGISTER OF RAINFALL IN 1911.

Kept at *Kew Observatory*

in the County of *Surrey* 5

by *The Staff*

RAIN GAUGE	Pattern	Beckley S.R.
	Diameter of top	11 in.
	Height of top above Ground	1 ft. 9 in.
	" " " Sea Level	19 ft. 162

Time of Observation 10 a.m.

Nearest Railway Station: Name Richmond; Distance ¾ mile; Direction E.S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A.
BRITISH RAINFALL.
2 JAN 1913

162

REGISTER OF RAINFALL IN 1912.

Kept at M. O. Central Observatory. (Kew Obsy)
in the County of Surrey. 5
by "The Staff"

Lat. 51° 28' 6" N. Long. 0 h. 1 m. 15 s. 1
Time of Observation 10 am.
Nearest Railway Station Richmond.
Diameter of Rain Gauge 11 in.
Height of top of Gauge above Ground 1 ft. 9 in.
" " " " Sea Level 19 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A.
BRITISH RAINFALL.

5 JAN 1914 162

REGISTER OF RAINFALL IN 1913

ept at Kew Observatory

n the County of Surrey

harles Chree
Superintendent

Lat. 51° 28' 6" Long. 0° 19' W
Time of Observation 10 a.m.
Nearest Railway Station Richmond
Diameter of Rain Gauge 8 in.
Height of top of Gauge above Ground 1 ft. 9 in.
" " " " Sea Level [illegible] ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1915

FORM A. BRITISH RAINFALL.

27 MAR 1916

Kept at Kew Observatory (check g.)
in the County of Surrey
by M.O.

Lat. Long.
Time of Observation
Nearest Railway Station
Diameter of Funnel of Rain Gauge in.
Height of top of Gauge above Ground ft. in.
" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1917

FORM A.
BRITISH RAINFALL.

162

Kept at Kew

in the County of Surrey

by

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

Dear Sir,

I am much obliged to you for your letter regarding the new gauge at Margery Hall Reservoir and I see no objection whatever to the interpolation of your estimate of the rainfall unrecorded for the first twelve days in January which differs only 0.12 inches from the figures I suggested to you in my letter of April 4th.

Yours faithfully,

W Vaux Graham

Dear Dr Mill,

Enclosed I have the pleasure to send you my usual Sutton W.W. Rainfall Records. That from Margery Hall Reservoir, having regard to its elevation seems very low but I have no reason to think it is not quite accurate.

Yours very truly,

Dr H. R. Mill.
62, Camden Square.
